

# Quarantine Rules for the Importation of Dogs or Cats into Taiwan

Bureau of Animal and Plant Health Inspection and Quarantine, BAPHIQ (Oct. 8, 2010)

(In case of any discrepancy between the Chinese text and the English translation thereof, the Chinese text shall govern.)

No case of rabies in Taiwan has occurred since 1961. In order to keep the rabies-free situation of Taiwan and protect residents from the threat to this zoonosis, owners intending to ship their dogs or cats into Taiwan, please make sure the epidemiological situation of the exporting country, and then precede the application according to this quarantine instruction.

1. Rabies-free country and Rabies-infected countries (zones): According to the latest promulgation of Council of Agriculture, Japan, United Kingdom, Sweden, Iceland, Australia, New Zealand, Norway (not include the archipelago of Svalbard), Hawaii state of the United States of America are recognized as Rabies-free countries (zones). For countries (zones) not recognized as Rabies-free countries (zones) are recognized as Rabies-infected countries (zones).
2. Related regulations:
  - (1) **Dogs or cats to be shipped from rabies-infected countries (zones) : Please refer to Attachment 1.**
  - (2) **Dogs or cats to be shipped from rabies-free countries (zones) : Please refer to Attachment 2.**
3. Other regulations:
  - (1) Due to the change of epidemiological situation of exporting countries, please be advised to access the latest information on list of disease-free countries through the web site of this Bureau ([www.baphiq.gov.tw](http://www.baphiq.gov.tw)).
  - (2) The pregnant dog or cat to be imported will be allowed entry only when the pregnancy is under 4 weeks at the time of shipment.
  - (3) Dogs or cats from Bangladesh and China (not include Hong Kong and Macao) are not allowed to be imported into Taiwan.
  - (4) Dogs or cats shall not be transshipped through Bangladesh or China (not include Hong Kong and Macao).
  - (5) Cats imported from Australia shall be in compliance with the regulation of importing from rabies-free country and the original veterinary certificate in English issued by the animal quarantine authorities of Australia government shall attest following information additionally.
    - (A) The cats shall come from the premises where Hendra disease has not occurred for the past 6 months.
    - (B) The cats shall be detained for pre-export quarantine in an isolated quarantine premises approved by the Australia government for at least 28 days prior to shipment. During the pre-export quarantine, the cats shall be subjected to serum neutralization test against Hendra virus twice with negative results. The interval between these twice tests shall exceed 21 days.

- (C) In the 24 hours prior shipment, the cats shall be inspected and found free from clinical evidence of Hendra disease.
- (6) Dogs or cats imported from Thailand shall be in compliance with the regulation of importing from rabies-infected country and the following quarantine requirements:
- (A) The dogs and cats shall be detained for pre-export quarantine in an approved isolated quarantine premises under the supervision of the animal quarantine authorities of Thailand government for at least 21 days prior to shipment. During the pre-export quarantine, the dogs and cats shall be inspected and found free from clinical evidence of any communicable disease and be subject to the following avian influenza tests with the designated time and method:
- (i) Nasal swab samples from dogs and cats shall be taken on 14 days prior to export, and be tested by reverse-transcription polymerase chain reaction (RT-PCR) test for H5 subtype virus with negative results.
  - (ii) Sera samples from dogs and cats shall be taken on 7 days prior to export, and be tested by Haemagglutination inhibition (HI) test for antibody against H5 subtype virus with negative results.
- (B) The original veterinary certificate in English issued by the animal quarantine authorities of Thailand government should attest additionally the beginning and end dates of pre-export quarantine, dates of samples collection for avian influenza diagnostic tests, test methods, subtype avian influenza virus being tested, dates of tests and test results.
- (7) Dogs or cats imported from Malaysia shall be in compliance with the regulation of importing from rabies-infected country and the following Nipah virus quarantine requirements:
- (A) The dogs and cats shall be detained for pre-export quarantine in an approved isolated quarantine premises under the supervision of the animal quarantine authorities of Malaysia government for at least 45 days prior to shipment. During the pre-export quarantine, the dogs and cats shall be inspected and found free from clinical evidence of Nipah virus disease.
- (B) The dogs and cats shall be bled at least 14 days but not more than 45 days prior to shipment. The sera shall be sent to Veterinary Research Institute, Department of Veterinary Services, Ministry of Agriculture Malaysia (VRI) or Australian Animal Health Laboratory (AAHL) for Nipah virus serology using enzyme-linked immunosorbent assay (ELISA) or virus neutralization test. The test results shall be negative.
- (C) The original veterinary certificate in English issued by the animal quarantine authorities of Malaysia government should attest additionally the dogs and cats are inspected and found free from clinical evidence of Nipah virus disease, the beginning and end dates of pre-export quarantine, date of samples collection for Nipah virus tests, test methods, name of the test laboratory, dates of tests and test results.

## Attachment 1

### **Dogs or cats to be shipped from rabies-infected countries (zones)**

1. The dog or cat to be imported shall have been implanted microchip and be vaccinated against rabies, in the case of a primary vaccination, at the age of at least 90 days old, and the period between the day of vaccination and the day of shipment shall be no less than 180 days and no more than one year. In the case of a booster vaccination, the animal shall have been vaccinated no more than one year prior to shipment.
2. At least 180 days prior to shipment, blood sample of dogs or cats to be imported shall be taken and sent to rabies reference laboratories of the World Organization for Animal Health or laboratories designated by BAPHIQ (list is as attachment C) for neutralization antibody titration test for rabies antibody which shall be at least 0.5 IU/ml.
3. The importer shall apply for an import permit and make reservation of the post-entry quarantine space from animal quarantine authority at the port of entry (contact information, attachment B), at least 30 days prior to shipment by submitting the following documents:
  - (1) Application (Application form, attachment A).
  - (2) Rabies vaccination certificate issued by a veterinarian of exporting country and certifying vaccination by inactivated vaccines. The rabies vaccination certificate shall be in Chinese, English or bilingual and state the breed, sex, age, microchip number, date of vaccination against rabies with inactive vaccine, and whether the vaccination was primary or a booster.
  - (3) Report of neutralization antibody titration test for rabies antibody which shall be at least 0.5 IU/ml and tested by rabies reference laboratories of the World Organization for Animal Health or laboratories designated by BAPHIQ with the blood sampling date no less than 180 days and no more than 2 years prior to shipment.
  - (4) A copy of passport or identification card of the importer.
4. The importer shall apply to the animal quarantine authority of exporting country for a veterinary certificate, and the veterinary certificate shall be in Chinese, English or bilingual and include the following information:
  - (1) Breed, sex, age, and microchip number of the dog or cat.
  - (2) Date of vaccination against rabies with inactivated vaccine, and whether the vaccination was primary or a booster.
  - (3) No clinical sign of rabies shown upon inspection of the dog or cat.
  - (4) At least 0.5 IU/ml rabies antibody in the blood of the dog or cat sampled no less than 180 days and no more than 2 years prior to shipment for a neutralization antibody titration test which shall be carried out by rabies reference laboratories of the World Organization for Animal Health or laboratories designated by BAPHIQ.
5. For the dog or cat that has been exported from Taiwan to rabies-infected countries

(zones) for a short period to be re-imported:

(1) The importer shall apply for an import permit and make reservation of the post-entry quarantine space from animal quarantine authority at the port of entry, at least 30 days prior to shipment from the country owner visited by submitting the following documents:

(A) Application (Attachment A).

(B) A copy of export veterinary certificate issued from the Branch of BAPHIQ.

(C) Report of neutralization antibody titration test for rabies antibody: Before the dog or cat exported to the rabies-infected countries from Taiwan, the dog or cat has been taken blood for practicing the neutralization antibody titration test. Moreover, the neutralization antibody titration is at least 0.5 IU/ml and tested by rabies reference laboratories of the World Organization for Animal Health or laboratories designated by BAPHIQ (Attachment C). The period between the sampling day and the re-importing day shall be no longer than 2 years.

(D) A copy of passport or identification card of the importer.

(E) A copy of the I.D. for registered pet of the dog.

(2) The importer shall apply to the animal quarantine authority of exporting country for a veterinary certificate, and the veterinary certificate shall be in Chinese, English or bilingual and include the following information:

(A) Breed, sex, age, and microchip number of the dog or cat.

(B) Date of vaccination against rabies with inactivated vaccine, and whether the vaccination was primary or a booster.

(C) No clinical sign of rabies shown upon inspection of the dog or cat.

(D) The neutralization antibody titration test for rabies antibody had performed by rabies reference laboratories of the World Organization for Animal Health or laboratories designated by BAPHIQ before the dog or cat exported from Taiwan. At least 0.5 IU/ml rabies antibody in the blood of the dog or cat and the period between the sampling day and the re-importing day shall be no longer than 2 years.

6. On arrival of the dog or cat at the port of entry, the importer shall apply to the animal quarantine authority for quarantine inspection and submit the import permit, original veterinary certificate issued by the animal quarantine authority of exporting country, bill of lading (B/L) or customs declaration form. **The dog or cat without an original veterinary certificate issued by the animal quarantine authority of exporting country shall be re-exported or destroyed.**

7. When conducting quarantine inspection of the dog or cat imported from rabies-infected countries (zones), animal quarantine authority at the port of entry shall check the veterinary certificate and detain the dog or cat at the designated post-entry quarantine premise for 21 days. The quarantine period shall be extended if BAPHIQ considers that it is necessary. During quarantine detention, the blood of the dog or cat may be sampled and tested again for rabies antibody. If the rabies antibody is under 0.5 IU/ml, the dog

or cat shall be revaccinated with inactivated rabies vaccine.

8. **Please be advised that if any incompliance is found in the statement of the certificate, the dog or cat will be re-exported, destroyed or detained at the designated post-entry quarantine premise for 180 days.**

## Attachment 2

### Dogs or cats to be shipped from rabies-free countries (zones)

1. The dog or cat to be imported shall have been implanted microchip and vaccinated against rabies when at the age of at least 90 days old; and the period between the day of vaccination and the day of shipment shall be no less than 30 days and no more than one year.
2. The importer shall apply for an import permit from animal quarantine authority at the port of entry (contact information, attachment B), at least 30 days prior to shipment by submitting the following documents:
  - (1) Application (Application form, attachment A)
  - (2) Rabies vaccination certificate issued by a veterinarian of exporting country and certifying vaccination by inactivated vaccines. The rabies vaccination certificate shall be in Chinese, English or bilingual and state the breed, sex, age, microchip number, date of vaccination against rabies with inactive vaccine, and whether the vaccination was primary or a booster.
  - (3) A copy of passport or identification card of the importer.
3. The importer shall apply to the animal quarantine authority of exporting country for a veterinary certificate, and the veterinary certificate shall be in Chinese, English or bilingual and include the following information:
  - (1) Breed, sex, age, and microchip number of the dog or cat.
  - (2) Date of vaccination against rabies with inactivated vaccine, and whether the vaccination was primary or a booster.
  - (3) No clinical sign of rabies shown upon inspection of the dog or cat.
  - (4) No case of rabies reported in the exporting country (zone) for the past 2 years.
  - (5) The dog or cat has been raised in the exporting country (zone) continuously for at least 6 months prior to shipment or since birth.
4. On arrival of the dog or cat at the port of entry, the importer shall apply to the animal quarantine authority for quarantine inspection and submit the import permit, original veterinary certificate issued by the animal quarantine authority of exporting country, bill of lading (B/L) or customs declaration form. **The dog or cat without an original veterinary certificate issued by the animal quarantine authority of exporting country shall be re-exported or destroyed.**
5. When conducting quarantine inspection of the dog or cat imported from rabies-free countries (zones), animal quarantine authority at the port of entry shall check the veterinary certificate. If it is found in compliance with regulations and the dog or cat is confirmed free from clinical evidence of any communicable animal disease, the animal quarantine authority will issue a veterinary certificate and release the dog or cat.
6. Please be advised that if any incompliance is found in the statement of the certificate, the dogs or cats will be re-exported, destroyed or detained at the designated post-entry quarantine premise for at least 21 days.

7. For the dog or cat that has been exported from Taiwan to rabies-free countries (zones) for less than 6 months to be re-imported, the importer shall apply for an import permit at least 30 days prior to shipment from the country (zone) owner visited and submit an application with the following documents to animal quarantine authority at the port of entry (contact information, attachment B):

- (1) A copy of export veterinary certificate issued from the Branch of BAPHIQ.
- (2) A copy of passport or identification card of the importer.
- (3) A copy of the I.D. for registered pet of the dog.

The importer shall apply to the animal quarantine authority of exporting country for a veterinary certificate, and the veterinary certificate shall be in Chinese, English or bilingual and include the following information:

- (1) Breed, sex, age, and microchip number of the dog or cat.
- (2) Date of vaccination against rabies with inactivated vaccine, and whether the vaccination was primary or a booster
- (3) No clinical sign of rabies shown upon inspection of the dog or cat.
- (4) No case of rabies reported in the exporting country for the past 2 years
- (5) The dog or cat has not been to the third country since it arrived in this country (zone).

If the re-imported dog or cat without an import permit or the information of the veterinary certificate is not in compliance with the regulation, the dog or cat shall be re-exported, destroyed or detained at the designated post-entry quarantine premise for 21 days.

- 畜主之護照或身份證影本。A copy of the owner's passport or ID
- 輸出國動物醫院或政府動物檢疫機構簽發狂犬病預防注射證明書影本。A copy of Rabies vaccination certificate issued from the animal hospital or the official veterinarian of the exporting country
- 狂犬病中和抗體力價檢測報告 Report of neutralization antibody titration test for rabies antibody (自狂犬病疫區輸入者 dogs or cats from rabies infected countries only)

**註：**為了您的方便，台端可以郵寄、傳真、電子信件向防檢局新竹分局或高雄分局機場檢疫站或基隆分局台北松山機場檢疫站申請進口同意文件。For your convenience, please send all documents by mail, or fax, or e-mail to Hsinchu Branch or Kaohsiung Airport Inspection Station of Kaohsiung Branch or Taipei Songshan Airport Inspection Station of Keelung Branch to apply an import permit.

犬貓自狂犬病疫區輸入，請選擇隔離檢疫場所 Please pick the premises for pet's quarantine which pets from rabies infected countries only :

- 國立台灣大學生農院附設動物醫院 (限自台灣桃園機場(中正機場)或台北松山機場輸入且畜主居住新竹以北者) National Taiwan University (Only for entering via Taiwan Taoyuan (CKS) airport or Taipei Songshan airport and the owner lives in northern cities)
- 國立中興大學獸醫學院附設獸醫教學醫院 (限自台灣桃園機場(中正機場)或台北松山機場輸入且畜主居住新竹以南者) National Chung Hsing University (Only for entering via Taiwan Taoyuan (CKS) airport or Taipei Songshan airport and the owner lives in Middle Taiwan)
- 國立屏東科技大學附設動物醫院 (限自高雄機場輸入) National Pingtung University (Only for entering via Kaohsiung airport)

申請人簽名 Signature : \_\_\_\_\_

## Attachment B

### Import permit to be obtained from:

For your convenience, please send all documents by mail, fax, or e-mail to the following animal quarantine authority for an import permit application.

A. Imported via Taiwan Taoyuan (CKS) airport:

Hsinchu Branch, Bureau of Animal and Plant Health Inspection and Quarantine

Tel No.: 886-3-3982431

Fax No.:886-3-3982310 or 886-3-3982313

E-mail: [hc04@mail.hcbaphiq.gov.tw](mailto:hc04@mail.hcbaphiq.gov.tw)

B. Imported via Kaohsiung airport:

Kaohsiung Airport Inspection Station, Kaohsiung Branch, Bureau of Animal and Plant Health Inspection and Quarantine

Tel No.: 886-7-8057790

Fax No.:886-7-8068427

E-mail: [kh0701@mail.khbaphiq.gov.tw](mailto:kh0701@mail.khbaphiq.gov.tw)

C. Imported via Taipei Songshan airport:

Taipei Songshan Airport Inspection Station, Keelung Branch, Bureau of Animal and Plant Health Inspection and Quarantine

Tel No.: 886-2-87701535

Fax No.:886-2-25462802

E-mail: [arrival@mail.klbaphiq.gov.tw](mailto:arrival@mail.klbaphiq.gov.tw)

### Designated quarantine premises:

Imported via Taiwan Taoyuan (CKS) airport or Taipei Songshan airport and applicant lives in Northern Taiwan:

National Taiwan University Veterinary Hospital

Address: No.153, Section 3, Keelung Road, Taipei, Taiwan, R.O.C.

Tel. No.: 886-2-27358621

Imported via Taiwan Taoyuan (CKS) airport or Taipei Songshan airport and applicant lives in Middle Taiwan:

Veterinary Teaching Hospital of the National Chung Hsing University

Address: No.250, Kaokwang Road, Taichung City, Taiwan, R.O.C.

Tel. No.: 886-4-22870180

Imported via Kaohsiung airport:

Animal Medical Teaching Hospital of the National Pingtung University of Science and Technology

Address: No.1, Shuehfu Road, Neipu, Pingtung, Taiwan, R.O.C.

Tel No.: 886-8-7740270
